

Northline — Internal pricing & value FAQ

=====

Company name: Northline

Vertical: B2B workflow SaaS for mid-market ops teams

PRICING

List seat price: \$135/seat/mo

Floor (approval required below): \$95

Competitor often quotes: \$85/seat/mo

Notes for AEs:

- Do not open with a discount. Discover what “too expensive” means first.
- Annual prepay and multi-year can trade before touching list.
- Never invent pricing below the \$95 floor without VP Finance.

VALUE ANCHORS

- Time-to-value under 14 days with a dedicated CSM
- SOC2 Type II + SSO included on every plan
- 99.9% uptime SLA with service credits
- Migration playbook for teams leaving spreadsheets or legacy tools
- Shared success plan with quarterly business reviews

FEE OBJECTION — APPROVED PLAY (optional AI cue patch)

When a buyer says list is too high vs a competitor quote:

- 1) Clarify what failed rollout costs them this quarter.
- 2) Anchor on CSM + time-to-value, not features.
- 3) Offer annual prepay before moving seat price.

Never: match the competitor number in the first reply.

SECURITY / FAQ DUMP

Q: Do you support SSO?

A: Yes — SAML and OIDC on Growth and above.

Q: Where is data hosted?

A: US-East primary; EU residency available on Enterprise.

Q: Can we pilot?

A: 30-day pilot on one team with success criteria agreed up front — not unlimited free seats.
